

RJ Power is an electrical contractor. The main core business centres on the design, supply, installation and commissioning of electrical services and systems.

The success of our business is built on developing strong relationships with our clients, being committed to providing our clients with the highest standard of service from start to finish.

The role of the design team is to ensure that all designs are completed within the appropriate timeline, using the most cost-effective design solutions whilst complying with all the necessary industry standards and client requirements.

As part of the design element of our projects:

- All design work will be carried out by staff who are suitably qualified, trained and experienced within the industry.
- We will seek to remove all hazards from a design perspective, to ensure the safety and well-being of those who will be required to use and maintain the products we design.
- We will work with clients to source sustainable materials as part of the design process.
- We will work collaboratively with the Client, Principal Contractor, and others to ensure that the design requirements are compliant with industry standards and are clearly understood by all.
- Our Design Team will create a work environment that is free of harassment and bullying, to ensure that everyone is treated with respect.

Design processes will be completed through:

- Design Planning – Formulating and agreeing the client’s concept & requirements.
- Design Input – interfacing with client to define and agree detailed specification.
- Design Output – Generation of drawings / prototype / test samples.
- Design Reviews – Checking progress at stages.
- Change Control – Ensuring agreed changes are controlled.
- Verification of finished product – Checking against agreed specification.
- Validation of finished project – Checking product performs to expected requirements.

All employees and others working for RJ Power, are required to comply with this policy to ensure they co-operate and carry out activities in a responsible manner. It is the responsibility of RJ Power management and supervisory staff to ensure that this policy and its arrangements are implemented.

This policy will be reviewed annually and revised as often as may be deemed appropriate by RJ Power and then communicated and explained to all employees and sub-contractors. This policy is available to the public and all other interested parties on request.

Signed:

Peter White
